- Basic Python Implementation

Professional Projects

Web Development

- Developed a personal website using HTML, CSS, & Java Script showcasing various projects through a visually appealing, user friendly design. Various functions such as comment submission forms and social media plugins make the website interactive and convenient for users to connect to the artist.

Website Hosting

- Assigned various websites to domains using hosting services such as GitHub. Also utilized GitHub for collaborative coding and updating projects with large teams.

Collaboration Project/ Online 3D Museum

- Successfully collaborated with a group of 15 people in an online 3D exhibit hosted on New Art City. Contributed by designing 3D assets and managing project timeline.

2D game Programming

- Designed and programmed a 2D Platformer game in collaboration with visual artists. Used Unity to implement given assets within a setting and coded all assets within the game using C#. Created directional movement (left/right/jump) for the game character as well as time based moving/falling objects.
